

Avian Influenza Exposure REDCap management: Operational work instructions

Intended Audience

- GVPHU Health Protection Team
 - Public Health Officers (PHOs)
 - Team Leaders (TLs)

Purpose

The purpose of this work instruction is to provide clear guidance for operational staff, including Public Health Officers (PHOs) and Team Leaders (TLs), on the use of REDCap to support the identification, risk assessment, and management of individuals with potential exposure to Highly Pathogenic Avian Influenza (HPAI). This includes processes for triaging contacts, assessing exposure risk, identifying symptomatic individuals, and initiating appropriate public health actions such as monitoring and testing.

Pre-Requisites

Access to PHESS	Necessary
Access to REDCap	Necessary

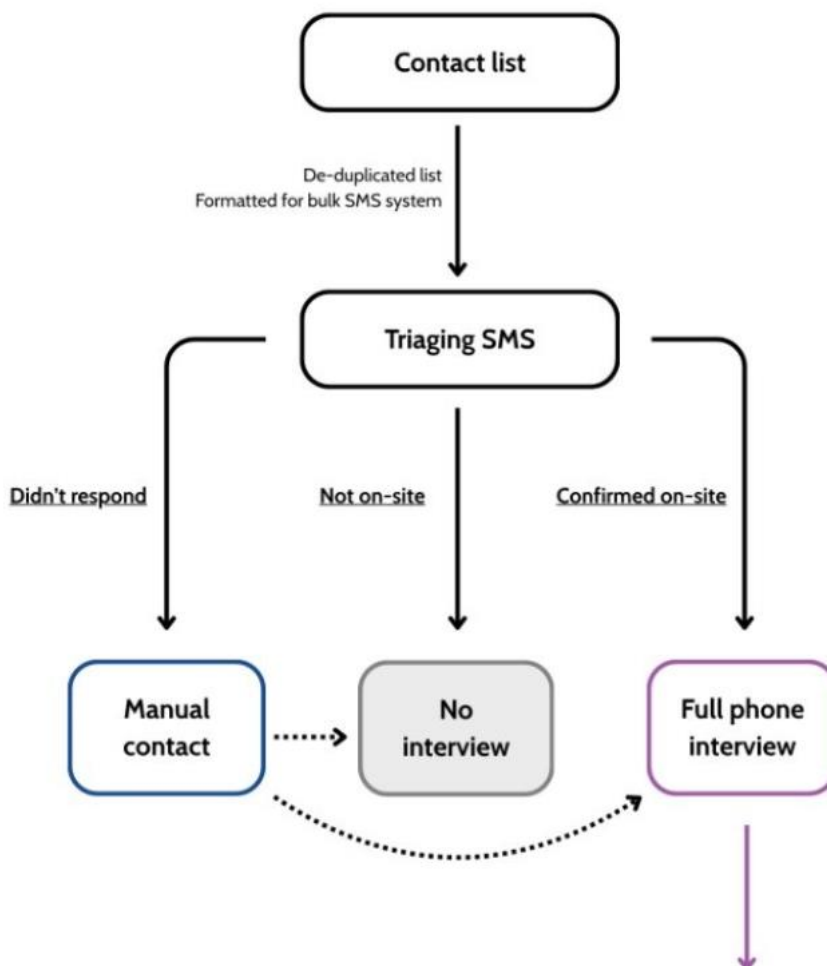

Introduction

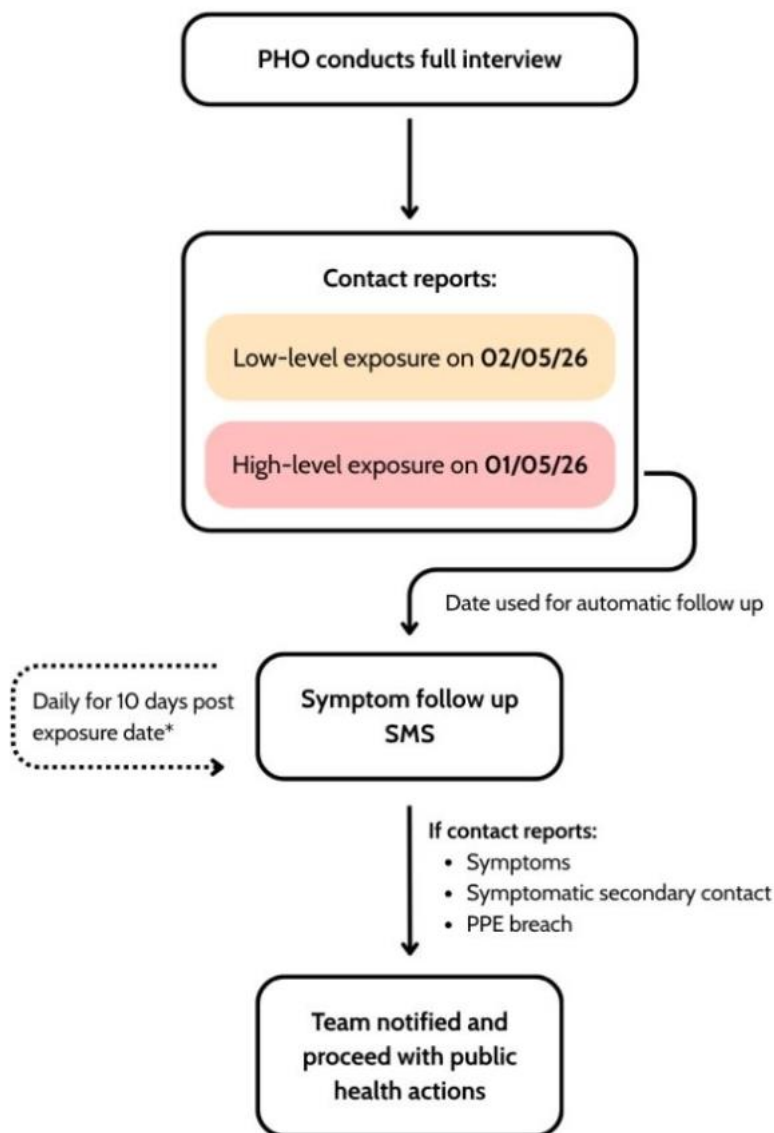

Highly Pathogenic Avian Influenza (HPAI) can cause severe disease in birds and other wild and agricultural animals, with risk of spillover into humans who have been in close contact with infected animals.

When poultry farms, or other large animal agriculture facilities, have incursions of HPAI, a large number of people can be exposed depending on the size of the operation. Like any mass exposure event, this can pose significant operational pressure for the responding Public Health Unit/s.

The HPAI Exposure Management REDCap workflow aims to support the operational public health management of these exposed individuals through SMS assisted triaging of contacts to

see who was exposed, streamlining data entry for interviews, using automated SMS symptom follow up and bulk data import and cleaning processes.

*Logic used reflects current protocol. Protocol may be subject to change (IMT)

Preliminary Steps

- Log in to REDCap using your respective access details through your respective server.

Log In

Please log in with your user name and password. If you are having trouble logging in, please contact [Emma MacDonald - REDCap Administrator](#).

Username:	henleysb
Password:	
Log In	

- Navigate to the HPAI project as named by the authors.
- The REDCap project view should look similar to the image below, with access to reports and ability to add records.

		No upcoming events

- Ensure appropriate access to the relevant HPAI REDCap project. The project will be created by Epidemiology, Data and Analytics (EDA) team after the outbreak notification.
 - Access to reports:
 - Interview Triage – Operational List
 - High-Level Exposure Contact List
 - Symptomatic Contact List

- Symptomatic Secondary Contacts List
 - If access is not available, contact a member of the EDA team to get the required access.

Key REDCap Reports

Interview Triage List

- List of individuals requiring follow-up exposure risk assessment, including:
 - Individuals reporting presence at key exposure sites.
 - Individuals who have not responded to triage SMS.

Symptomatic Contact List

- List of contacts who have reported symptoms at *any time* during the period of interest.
(Note: Multiple entries may exist per individual due to repeated follow-up responses).

High-Level Exposure Contact List

- List of contacts classified as having high-level exposures.

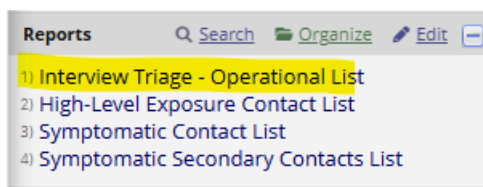

Symptomatic Secondary Contacts List

- List of additional contacts identified as symptomatic through case interviews or follow-up surveys.

Risk Assessment

Review Interview Triage

- Open the “Interview Triage List” report in REDCap

- Review the report to identify individuals requiring follow-up.
- Prioritise:
 - Individuals who have responded to the triage survey indicating they have been exposed.
Eg. Record ID 2 below
 - Individuals who have not responded to SMS.
Eg. Record ID 13 below

Interview Triage - Operational List

List of contacts who have indicated being onsite at key premises OR who have not responded to triaging text and require interview

Record ID record_id	Survey Identifier redcap_survey_identifier	PHO name pho_name	LPHU lphu	Contact name contact_name	Date of birth birth_date	Postcode	Suburb / Town address_suburb_town	Contact number contact_number	Survey Timestamp avian_influenza_triage_ip1_timestamp	Were you on site at [triage_sitename_ip1] between [triage_startdate_ip1] and [triage_enddate_ip1]? exposure_ip1_yn	Survey Timestamp avian_influenza_triage_facility_ip2_timestamp	Were [triage] between [triage] and [triage] expos
2		Merryn	GVPHU (1)	fake	10-11-1995	3350	Ballarat North		25-03-2026 12:39	Yes (1)		
3		Jade	GVPHU (1)	Jade	09-10-2002	3000	CBD		25-03-2026 12:39	Yes (1)

7		Brandon (GVPHU)	GVPHU (1)	Brandon	10-06-1997	3636	Shepparton			Yes (1)		No (0)
8		Brandon (GVPHU)	GVPHU (1)	bran	10-06-1997	3636	Shepparton		25-03-2026 13:52	Yes (1)		No (0)
9				george					25-03-2026 12:39	Yes (1)		
11				niki					25-03-2026 12:39	Yes (1)		
12				laura					25-03-2026 12:39	Yes (1)		
13				solly								
14				Jack						Yes (1)		
15				Will						Yes (1)		
16		Merryn	GVPHU (1)	Frida	01-01-1980				26-03-2026 11:46	Yes (1)		

Conduct Exposure Risk Assessment

- Select the "Record ID" of the contact you will be conducting the risk assessment for, i.e. "2".
- Confirm from the contact has had an exposure by reviewing the "Avian Influenza Triage" Questionnaire/s - this may be pre-filled if they have responded to a triage SMS.

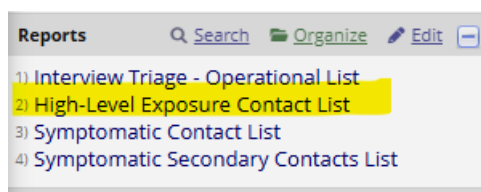

Data Collection Instrument	Status
Contact Upload Variables	☐
Avian Influenza Triage IP1 (survey)	☒
Avian Influenza Triage IP2 (survey)	☐
Avian Influenza Contact Demographics	☐
Avian Influenza Contact Facility IP1 Risk	☐
Avian Influenza Contact Facility IP2 Risk	☐
Avian Influenza Contact Symptoms Treatment	☐
PHU Data Entry	☐
Avian Influenza Follow-Up (survey)	☐

- If the case has been on the IP during the exposure period, navigate to the "Avian Influenza Case Demographics" to begin the questionnaire.
- Contact the individual via phone.
- Proceed to conduct the interview, risk assessment and recommendations for the exposed individual by answering all questions and reviewing all sections from:
 - "Avian Influenza Contact Demographics"
 - "Avian Influenza Contact Facility IP1 (or whichever infected premise of interest) Risk"

- This form included a PHO conducted risk assessment which should be determined using the relevant protocol/IMT decided risk assessment criteria.
 - “Avian Influenza Contact Symptoms Treatment”
- Please ensure ALL fields are completed whilst completing these forms. If required:
 - ‘Unknown’ if the answer to the question was unable to be determined.
 - ‘Not stated’ if the interviewee does not provide answer
 - A blank answer implies the question was not asked.

High-Level Exposure Contacts

- Review the report “High-Level Exposure Contact List” for the full list of contacts that have been risk assessed to have had a high-level exposure.

- Ensure management for each high-level exposure contact has been conducted according to protocol including the provision of education, recommendation of seasonal influenza vaccination and arrangement of PEP in line with the Avian Influenza Disease Control Guideline page 35 table 2.
 - Contact monitoring will be conducted through the HPAI Exposure Management REDCap workflow

High-Level Exposure Contact List

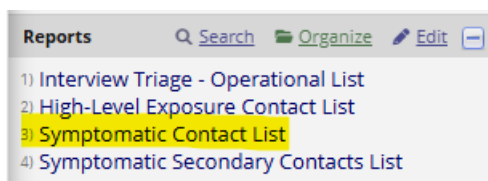

List of all individuals determined to have high-level exposures.

Symptomatic Contacts

- Review the report “Symptomatic Contact List” of all individuals who have ever reported experiencing symptoms during the period of interest, either in the original survey or automated SMS follow-up.
 - Note: Please note that there may be multiple rows per individual on this report as we have a new row for each symptom follow-up form response.*
- Any contacts who respond to follow-up monitoring indicating they have symptoms, an alert will be sent via REDCap to the respective operational email address, for prompt follow-up.

- Ensure management for each symptomatic contact has been conducted including the arrangement of testing in line with the Avian Influenza Disease Control Guideline page 34.

Symptomatic Contact List

List of all contacts who have ever reported experiencing symptoms during the period of interest, either in the original survey or automated SMS follow-up.

Please note that there may be multiple rows per contact on this report as we have a new row for each symptom follow up form response.
